Self Assessment Questions

Objectives: The purpose of this specific Major Deliverable is to provide a basis for feedback and reflection regarding your progress in meeting the requirements of individual courses offered by the Institute of Archaeology. This Major Deliverable should constitute no less than two, and no more than three, double-spaced typewritten pages of text. This Deliverable's prime objective is to have you more fully reflect upon and consider your respective contributions and engagement and participation with Lab and Field Deliverables undertaken and completed to date.

Please consider the following aspects of your performance and participation in this course. Respond to each of the following questions for your self-assessment.

1. First, state your purpose for enrolling in this class. Having stated said purpose, please comment on the extent to which you feel your objectives for taking this course have been met or not met.
2. Comment on your participation in Lab and Major (or Field) Deliverables. Have you attended all class meetings and participated in all Lab Deliverables, and completed all Major Deliverables, undertaken to date? To what extent have you actually involved and committed yourself to the completion of Lab and Major Deliverables?
3. How effectively have you used the Online Journal? Do you feel that your comments within the Online Journal adequately reflect the areas of study undertaken by each of the Deliverables in question? Are you satisfied with your responses to questions and comments posted to the Online Journal? If not satisfied, why not?
4. How are you progressing with the topic of study that you will use to prepare your final project report? [Disregard if you have chosen the Field or Challenge Options over the preparation of a final term project]. If you have chosen a Field or Lab Option (where available), please comment on what you feel that you have learned from your work at the field site or within the lab.
5. Please state in the most concise way possible, what it is that you intend to do in the way of a final project report or demonstration. For those choosing the Field or Lab or other Challenge Option, you should state whether or not you intend to use the Challenge Option or other lab and field project efforts as the primary subject matter of your final report or demonstration. For those choosing a library research paper, please provide at least eight of the primary references that you intend to use in the completion of your final project paper or report.
6. What key concepts and areas of study engaged from within the Challenge Option available, or lab and field efforts undertaken, have been of most interest to you? How will such concepts

and areas of study be reflected or not reflected in your intended final class project or presentation?

7. Please comment on which Lab and Major Deliverables you enjoyed most...and which you enjoyed least. Please provide recommendations on how you might improve on the content and type of Lab and Major Deliverables, or lab and field options, offered in this section. What might you like to see added in the way of Lab and Major Deliverables or field projects?

8. How do you plan on improving upon your performance through the duration of this semester...or in other related classes in the future? Please identify those areas that you feel require improvement (e.g., readings or time management). Finally, please identify what you see – or have identified -- as your primary academic and scholastic strengths with respect to Lab and Major Deliverables, and class participation and engagement, completed to date.
